

sports, diagnostics, medical and rehabilitation treadmills

pluto® med with standard handrails

reliable treadmills made in germany

German Engineering since 1988

Benefit from our experience since 1988 in building and servicing standard and customized treadmill solutions around the globe.

pluto® med with optional paediatric handrails [cos102400-01va01]

pluto® med with optional long handrails [cos102918-01]
and safety arch fall prevention [cos10079-01va01]

h/p/cosmos standard

h/p/cosmos has been developing and building treadmills since 1988 in Germany for various fields including fitness, competitive sports, sports medicine, orthopedic and neurological rehabilitation, sport science, biomechanics, uniformed services, performance diagnostics, cardiopulmonary diagnostics and rehabilitation. This experience, maximum standards in quality and advanced technology are the foundation of our business and also reflected in the pluto® med treadmills.

The outstanding level of h/p/cosmos products and service as well as attractive prices form the h/p/cosmos standard.

Stable and low-maintenance

With their stable frame, the treadmills are almost indestructible, very low-maintenance and offer both runner or patient a pleasant running feeling thanks to their state-of-the-art design. They also stand out due to their smooth running, their versatile functions, their powerful drive system and their timeless and user friendly design.

Medical device (class IIb) and sports treadmills

Our treadmills are available as risk class IIb medical treadmills as well as sports treadmills. As a medical device, they are particularly suitable for the use in the fields of cardiology, neurology, cardiological rehabilitation and physiotherapy. The interface via coscom® v4 of the h/p/cosmos treadmill and ergometer series enables the connection to ECG, ergospirometry systems, blood pressure monitors and software programs.

Customer-specific configuration for individual solutions

Treadmills off the peg can be many, at h/p/cosmos you can also get your individually assembled treadmill solution with a large selection of options and accessories. Too little budget for the desired configuration? Changed demands on the treadmill system due to new business areas or new areas of application? No problem, most options and accessories can also be retrofitted at a later date. With h/p/cosmos you are always on the right track, because you cannot make the wrong decision due to the flexible and modular design.

flexible handrail concept

Some of our best selling handrail configurations:

pluto® med
with standard handrails

pluto® med
with optional long handrails [cos102918-01]

pluto® med
with optional adjustable handrails [cos102010va07]

pluto® med
with optional paediatric handrails [cos102400-01va01]

pluto® med
with optional very short handrails [cos103867]

pluto® med
with optional speed handrails [cos103651]
and extra wide footboards [cos103928]

The renewed h/p/cosmos handrail concept allows quick and flexible adaptations of the treadmill to various demands.

Standard and long handrail

The ingeniously simple plug-in concept makes it a child's play to change the handrails and adapt them to the required application. As standard we deliver all treadmills of the pluto® series with handrails, which cover about half of the running surface length. By quickly loosening two hex head screws, the short handrail can be easily removed and replaced by the therapist or trainer with a long handrail (reaching to the end of the running surface), either on one side or on both sides (for extended safety when stepping onto the running deck).

Adjustable handrail

h/p/cosmos treadmills can also be supplied with height and width adjustable handrails. This variant is ideal if you serve a heterogeneous clientele. They offer the different patient types (from children, to small and tall persons as well as for obese patients) optimal conditions for therapy and/or training. In combination with the optional arm support, you also enable patients to train more safely and without fear. As an additional feature, the optional arm support offers the possibility of a manual unweighting by the patient relieving partial body weight on these stable pads.

Very short handrail

For special applications, the handrails can be completely removed. Due to safety reasons, a crossbar must then be used, which is mounted on two very short handrails or on speed handrails with additional grips for better jump-on and jump-off during hyperspeed sprint trainings. This variant makes sense, for example, if a video analysis is carried out in the sagittal plane or if an ECG stress test is carried out in cardiology (handrail might interfere with cable routing).

options

pluto® med with adjustable handrails [cos102550-01], airwalk® ap unweighting system [cos30028], robowalk® front [cos30022-02va04] and back [cos30023-03]

pluto® med with adjustable handrails [cos102550-01], airwalk® ap unweighting system [cos30028], robowalk® front [cos30022-02va04], back [cos30023-03] and reverse belt rotation [cos10181-03]

arm support with 3 joints [cos12013-01] for all handrails (Ø 60 mm) and additional keyboard [cos104551]

Additional options for your individual treadmill solution

The numerous additional options allow you to adapt h/p/cosmos treadmills exactly to your needs and your field of application. Some of our most successful options:

Safety arch fall prevention

In the event of a fall, the patient is caught with a safety harness and the treadmill is automatically stopped.

Unweighting system airwalk® ap (with optional emergency stop)

Unweighting system (dynamic and continuously adjustable approx. 0.5 ... 80 kg) and optional emergency stop (patient is caught in a vest or neopren short and the treadmill stops). For operation of the airwalk® ap, a compressor is needed.

Reverse belt rotation

The running belt runs in the opposite direction. With the incline set at the same time, downhill running can be simulated. The option is available for all h/p/cosmos treadmills with incline option.

Active gait correction robowalk® expander

The h/p/cosmos robowalk® is a patented expander-pulley system for h/p/cosmos treadmills. The test person's legs are connected to the force level and force vector adjustable rubber cables via cuffs and offer support and resistance during the walking and running movement. Especially the traction support by the rubber cords is a valuable help for patients and therapists to perform exercises physiologically and longer, thus improving the therapy success.

Arm support (with additional stop button)

The individually adjustable arm supports give the patient stability and a feeling of safety. Arm support available with 3 joints for handrails with Ø 60 mm or for adjustable handrails.

Additional keyboard

The patient can control the treadmill without removing the arms from the armrests. Therapists can control the treadmill externally from a comfortable position around the treadmill.

Wheelchair ramp

Our wheelchair ramp enables patients to safely access the treadmill.

options

zebris® pressure distribution

The pluto® series treadmills can be equipped or retrofitted with an integrated pressure distribution platform from the German manufacturer zebris®.

This upgrade allows versatile applications for rehabilitation, training and analysis! Underneath the belt, a pressure sensor matrix is installed that contains several thousand calibrated, capacitive pressure sensors. The belt movement is compensated, so stable gait and roll-off parameters can be analysed and displayed in a comprehensive software interface as well as in reports - a well proven and established tool amongst therapists.

comprehensive pressure plot visualisation

adaptive visual cueing [cos101291-01] with projected steps on the treadmill belt

gait and coordination training on a treadmill using virtual feedback [cos101062] and dual-tasking

Gait training and adaptive visual cueing

The initial gait analysis is carried out without any measuring preparations to be done on the patient. The measuring process can be observed on the screen in real-time. The report is automatically generated. In order to prepare the gait training using adaptive visual cueing, the parameters from the gait analysis (step length & width and foot rotation) are automatically transferred and can be individually adjusted according to training objectives. The values remain constant or gradually approach the target settings during the course of the training. During training the steps are projected onto the treadmill belt in the shape of the actual footprints, or alternatively as rectangles. Throughout the gait training the patient is instructed to position his or her feet as accurately as possible within the projected area. The gait training including visual stimulation/cueing is also possible when using an unweighting system and thus also allows for patients who are suffering from severe functional limitations to start therapy even at an early stage. The report documents the adherence to the target settings. On that basis, the target parameters can be adjusted to the patient's individual capability. For an optimal training control, two gait analyses are compared, e.g. before and after a training period.

Gait and coordination training using virtual feedback

Physical and cognitive abilities are simultaneously demanded during dual-task-training in the virtual walking environment. The patient solves simple perceptual and memory tasks as well as arithmetic problems while walking and observing his or her footprints. Thus, reaction time and attentiveness are improved while simultaneously supporting automated walking. The various modules allow the training to be individually adapted to each patient.

perturbation applications

The user friendly interface with touchscreen allows an intuitive operation

Perturbation profiles - switching between selfmade and premade profiles

Quick Generator for a quick and reliable adjustment of perturbation parameters

h/p/cosmos perturbation module

The h/p/cosmos perturbation module can provide extremely sudden changes of the speed. This can be as sudden and unexpected, that it is mandatory to use a fall prevention system, such as the h/p/cosmos safety arch with harness or the unweighting system h/p/cosmos airwalk® ap. Due to the powerful motor, the acceleration can be as fast as 17.36 m/sec^2 (for comparison: the sportscar Bugatti Veyron needs 2.6 sec from 0 ... 100 km/h, that equals 15.2 m/sec^2). But most of the perturbation events within a training session will be on a lower level and allow a customized training to a wide spectrum of patients. In due course of the training progress, the intensity can be adjusted with a few clicks.

Research

Because of the majority of fall causes, research has focused on sudden accelerations, decelerations or stops of the treadmill (Kurz et al., 2016; Liu, Bhatt & Pai, 2016; McCrum et al., 2017; Pigman et al., 2019). While slips and trips are the main cause in real life, interferences in other planes can also happen. Science and industry have created various technical equipment, nevertheless they are cost-intensive and realism and relevance are often questionable.

Random factor

As in the real world the disturbances happen unexpectedly, the h/p/cosmos perturbation “quick generator” module includes a “random factor”. Subjects will not predict the exact time or kind of the next event.

Individualization and progression matters

Single perturbation events or complex training sessions can be configured individually, within the profile editor. The fastest way to set up a gait stability training session, is to use the “quick generator”. Sliding bars for the total training duration, the frequency and intensity (speed change and length in milliseconds) can be defined easily. If the subjects tolerate the training well, the overall intensity can be increased in a controlled manner.

evidence-driven development

Dual Tasking - name the country flag

Dual Tasking - Stroop Test

Quick Generator for quick and reliable adjustment of perturbation parameters

Perturbation as an add-on feature

The perturbation module is an innovative add-on feature to h/p/cosmos treadmills of the latest generation with UserTerminal Touch Pro.

The treadmill can easily be retrofitted with the perturbation module, provided that the treadmill is equipped with either a safety arch or an airwalk® ap unweighting system with emergency stop and harness to prevent subjects from falling.

Overview

Programmable via convenient user interfaces, the perturbation module enables therapists and trainers to perform a wide range of trainings without time consuming configuration or preparation:

- reactive stability training
- realistic slips and trips pattern in sagittal plane
- short events in milliseconds
- fixed pattern, activated by click
- random pattern for unpredictable trainings
- dual tasking and cognitive tests to distract
- highest patient safety, due to fall-stop and harness

Of course, the treadmill's standard functionalities are retained when the perturbation mode is deactivated, so no additional devices are needed to perform standard therapeutic or performance trainings such as

- non-perturbed rehabilitation training, endurance training walking or running
- gait analysis e.g. with optionally available pressure distribution
- cardio training, performance diagnostics

Random perturbation with a geriatric patient to improve his reactive stability

Sabine & Hans Lamprecht | HSH Lamprecht GbR, 73230 Kirchheim/Teck, Germany

Back in 1987, Sabine and Hans Lamprecht opened their first physiotherapy in Kirchheim/Teck close to Stuttgart. With more than 30 years of experience, they made their name in the German speaking territories and beyond for their evidence driven and practically oriented therapy approaches. Their science based but practical approach is the foundation for their daily work as therapists as well as their activities as authors of various reference books and as lecturer at European universities.

Already in the second generation, 2019 marked a milestone with the opening of the new and extended therapy facility with additional floor space and updated equipment. The team of over 40 passionate specialists supports patients in the fields of physiotherapy, occupational and speech therapy.

A free webinar series with Sabine Lamprecht has been recorded in her therapy facility on gait training and therapy and is available here:

When working with neurologic and orthopaedic patients, reliable and safe technology is key – both for the patient and the therapist. For many years, our team relies on h/p/cosmos when it comes to treadmills and ergometers.

Within the past 5 years, we were able to update, retrofit and extend our equipment. We are now able to adapt our equipment to the very individual needs of our customers – no matter if tall or small which is decisive for therapy success! One highlight and eye-catcher in our therapy is the unweighting system airwalk® ap with the locomotion® treadmill as well as robowalk® expanders for active gait correction and training. The treadmill is an invaluable tool for neurologic therapy and enables us to provide early and safe return to therapy. In 2020, we were able to retrofit the existing system with a zebris pressure distribution platform and the visual cueing system, further extending the possibilities (e.g. for Parkinson's disease) and applications.

The h/p/cosmos pluto® med is daily used for gait training and therapy in our facility and the perfect companion to the locomotion®. Its smooth start and movement at very low speed – even with overweight patients – makes patients feel secure! Long handrails in combination with the adjustable arm supports allow a safe access onto the treadmill and a stabilisation and even light manual unweighting of the patient during the training.

userterminal touch (pro) in practice

The combination of a 10.1" TouchScreen and a hardware keyboard allow an anytime secure handling of the treadmill - especially in situations of urgency.

The ergonomic position and setup of the UserTerminal Touch (Pro) enables therapists and trainers to customize the training or even profile with little time expenditure.

Gait stability training with optional perturbation module and safety arch fall prevention system with an elderly patient with Parkinson's disease

userterminal touch (pro)

The UserTerminal Touch (Pro) is the powerful heart of the latest h/p/cosmos treadmill.

The central part of every treadmill is the UserTerminal. Apart from h/p/cosmos It devices, that come without userterminals, most h/p/cosmos treadmills of the current product cycle already rely on the UserTerminal Touch or the even more powerful UserTerminal Touch Pro. Focussing on a userfriendly, safe and stable interface, the 10.1" UserTerminal Touch has been a milestone in the history of h/p/cosmos!

With the UserTerminal Touch and Touch Pro, innovative features like perturbation and dual tasking could be released and can be intuitively controlled with very short training. The 10,1" TouchScreen provides a good overview without blocking angles of view for therapists while the additional hardware keyboard guarantees perfect handling also with medical gloves or sweaty conditions.

Start screen with intuitive quick select buttons.

Selection of heart rate transmitters (5 kHz or Bluetooth).

Comprehensive programming interface of e.g. the cardio mode.

Clear and safe instructions in all areas of use.

Borg, modified Borg and Pain Scale allow detailed "in practice" tracking of athletes or patients' subjective constitution.

Rating of perceived Exertion (RPE) is directly protocolled in the workout report and report chart.

Multi-purpose display allows a wide range of additional information and tests, e.g. programmable speed shortcuts, or optional dual tasking and cognitive tasks. The display for optional dual tasking screens or cognitive tasks can be extended to the full screen while keeping all important training parameters in scope.

Clear graphs allow a detailed tracking of all relevant training parameters on one screen.

The summary screen provides an overview on the workout.

Personalization of reports (.pdf/.csv) enable traceability.

special colours (all RAL colours) on request and at extra charge
pluto® in special matt black for motion analysis (cos103019)

specifications airwalk® ap

unweighting device:	airwalk® ap
manufacturer:	h/p/cosmos sports & medical gmbh / Germany
order number:	cos30028
applications:	body weight support (during treadmill therapy/training) fall protection (during treadmill therapy/training) unweighted and/or secured balance training unweighted and/or secured functional and gait training overspeed/hyperspeed and excess frequency training
control:	pneumatic valve with rotary knob
max. body weight:	250 kg (551 lbs) valid for frame and rope textiles such as vest and shorts excluded
max. body height:	200 cm (6,5 ft.) (standard) 225 cm (7,4 ft.) (optionally at extra charge) possible restrictions with treadmill inclination >10%
body weight support:	dynamic, continuously adjustable at 6 bar: max. 50 kg (110 lbs) at 8 bar: max. 70 kg (150 lbs) at 10 bar: max. 90 kg (200 lbs) optionally at extra charge at 8 bar: max. 120 kg (265 lbs) vertical amplitude approx. 70 cm (2.3 ft.) max. rotation 1 x 360°
safety systems:	CE medical device regulation MDR (EU) 2017/745; ISO 20957-1; EN 14971; EN ISO 13485
classification:	medical device risk class I according to MDR, active therapeutic medical device
usage class:	S, I according to ISO 20957-1
ambient conditions:	temperature: +10...+30 °C humidity: 30...75 % air pressure: 700...1060 hPa
display:	analog manometer on device (standard)
resolution:	approx. 2.5 kg (5 lbs)
accessories (incl.)	instructions for use, 1 unweighting vest cos10095-vest-M (size M, thorax circumference 93...105 cm) 1 safety harness cos14903-M (size M, chest circumference 85 ... 115 cm) further sizes XXS ... XL at extra charge neoprene pants size. S, M, L at extra charge [cos10095-neo]
compatibility:	h/p/cosmos treadmills pluto®, mercury®, locomotion®, quasar®, pulsar® external devices only with written confirmation by h/p/cosmos treadmill not within scope of delivery
frame color:	standard: pure white RAL 9010 (powder coated)
comp. air supply:	coupling plug acc. to ISO4414
size of frame:	L: 236...276 cm (7.7 ... 9.1 ft.) (depending on treadmill) W: 177 cm (5.8 ft.) H: 273 cm (9.0 ft.) (standard) individual height (e.g. 248 cm or 298 cm) optionally at extra charge
net weight:	approx. 310 kg (683 lbs)
gross weight:	see separate position
optionally available:	compressor 0.8 bar (0...116 psi) (cos103058) attention: 8 bar pressure correspond to max. 70 kg support compressor 0...10 bar (0...145 psi) (cos103016) 10 bar compressor incl. soundproofing hood

Weight and dimensions may differ depending on accessories.

E&OE. Subject to alterations without prior notice.

Alternative: connection to existing compressed air system with 8...10 bar.

Furthermore optionally available at extra charge: emergency stop for running belt of an h/p/cosmos treadmill, pneumatic spring mode, robowalk expander, max. body weight support 160 / 240 kg (353 / 529 lbs), special frame colours, other options and accessories.

Weight and package specifications can deviate according to options, accessories, packing and way of transport. E&OE. Subject to alteration without notice.

Warning! Installation, commissioning, instruction, maintenance and repair work only to be conducted by h/p/cosmos trained and authorised personnel. Inspect the rope (cos 102317) at least once a month visually for wear or damage. Rope has to be replaced annually or even earlier at first sign of wear or damage. For any application where falling might cause an unacceptable risk (e.g. newly operated hip patients, invasive probes, osteoporosis, etc.) the subject has to be secured by a safety harness [cos14903] additionally. For more information see the instructions for use.

specifications pluto® sport

treadmill	pluto® sport
manufacturer:	h/p/cosmos sports & medical gmbh / Germany
country of origin:	Germany
EUDAMED SRN:	not applicable for sports devices
order number:	cos31021
UDI-DI	40505880036548 / GS1
Basic UDI-DI:	4050588cos31000R4
product family:	treadmill h/p/cosmos 150/50 G7
EMDN Code:	not applicable for sports devices
UMDNS Code:	not applicable for sports devices
GMDN Code:	not applicable for sports devices
applications:	endurance training walking and running
control:	UserTerminal with keyboard and touch display, alternatively via integrated interface coscom® v4
running deck:	L x W: 150 x 50 cm (4' 11.1" x 1' 7.6") access height: 23 cm (9.1") - running belt with slip resistant surface - max. permissible load: 250 kg (551 lbs) - max. permissible load: 300 kg (660 lbs) at extra charge
speed range:	0.0 ... 22.0 km/h (0.0 ... 6.1 m/s) (0.0...13.6 mph)
acceleration:	7 acceleration / deceleration levels (0.053...2.315 m/s²) levels 1 to 4 enabled, levels 5 to 7 at extra charge
elevation:	0 ... 25 % (0 ... 14.0°) motorized adjustment (-25 % ... +25 % when using optional reverse belt rotation)
running direction:	reverse belt rotation at extra charge without fall prevention the max. speed for reverse belt rotation is limited to 5 km/h (3.1 mph)
drive motor:	2.2 kW (3 HP) 3-phase AC motor, maintenance free and brushless For high-performance applications we recommend models with a 3-phase 3x400 Volt power supply and a running surface min. 190/65 cm
power transmission:	frequency inverter, poly-V-belt, very quiet operation
safety systems:	CE ; machinery regulation (EU) 2023/1230; EN 60335-1; EN 60601-1-2 (EMC tested); ISO 20957-1; ISO 20957-6; EN 14971; emergency-stop mushroom push button (drives power off) emergency-stop with pull-cord and clip
degree of protection:	appliance class I (⏏) / type B (⚡) / IP 20
classification:	sports and fitness device; not for medical, not for therapeutic applications
usage class:	S, I according to ISO 20957-1
accuracy class:	A (high accuracy) according to ISO 20957-6
earth leakage current:	< 2.5 mA
ambient condition:	temperature: +5 ... +40 °C (-30 ... +50 °C on request) humidity: 0 ... 85 % (up to 100 % on request) air pressure: 700 ... 1,060 hPa; 3,000 m (~10,000 ft) max altitude without pressurization
display (resolution):	25.9 cm / 10.1" (1280x800), color touch display
parameter: (It-devices via PC)	speed, time, elevation, distance, heart rate, heart rate variability energy consumption, altitude, power, pace, METs, diagram view of heart rate and load parameter, parameter export to USB
units:	metric / imperial
heart rate monitoring:	heart rate receiver included, BLE - Bluetooth® automatic control of speed and elevation according to programmed target heart rate („cardio mode“)
interfaces:	LAN / RJ45, RS232, USB RFID / NFC Reader (optional at extra charge) Bluetooth® (optional at extra charge)
programs: (It-devices via PC)	programs / profiles (predefined) - exercise profiles (scalable) - many test profiles (UKK Walktest, Conconi, Graded test, Gardner, Naughton, Ellestad, Cooper, Balke, Bruce, etc.) - freely definable programs also for further processing
PC software (incl.):	h/p/cosmos para control® for display & remote control;
accessories (incl.):	instruction for use on USB stick, service kit, 5 m LAN cable
frame color:	pure white RAL 9010 (powder coated)

handrails:	steel tube handrails Ø 60 mm on both sides, over min. 1/3 of treadmill length, other handrail designs optional at extra charge
voltage supply:	200 ... 240 Volt AC 1~N/PE 50/60 Hz 16 A fuse dedicated circuit, line and protection
dimensions:	L x W x H: 210 x 86 x 120 cm (6' 10.7" x 2' 9.86" x 3' 11.24")
mass of device:	approx. 225 kg (530 lbs)
packing size:	approx. L x W x H: 230 x 110 x 90 cm (7' 6.6" x 3' 7.3" x 2' 11.4") depending on accessories and requirements
mass of packaging:	approx. 75 ... 265 kg (165 ... 585 lbs) depending on accessories and requirements

Weight and dimensions may differ depending on accessories.

E&OE. Subject to alterations without prior notice.

Optionally available at extra charge are special frame colours, other handrail designs, special voltage supply, other options and accessories. Weight and package specifications can deviate according to options, accessories packing and way of transport. E&OE. Subject to alterations without prior notice. Please consider the natural and physical performance limitations of the single phase 230 volt power supply. The single phase 230 volt power supply is sufficient up to normal fitness or therapy applications. For all special high performance applications (speed running, controlled jump-ons, sidesteps, heavy subjects at higher speed, extreme elevations, etc.), we recommend models with a 3-phase, 3x400 volt power supply (for example model h/p/cosmos quasar med 3p, pulsar 3p, venus or saturn).

Warning! Installation, commissioning, instruction, maintenance and repair work only to be conducted by h/p/cosmos trained and authorised personnel. For treadmills with oversized deck (width >65cm), for children, special applications, without sufficient safety space behind the treadmill, for subjects and / or patients with health or other limitations (e.g. visual impairment, etc.), for running at high speed and / or for all individuals, where a fall triggers a dangerous risk of injury or death (e.g. newly operated hip patients, invasive probes, etc.), a fall prevention system is obligatory (e.g. safety arch with chest belt and harness or a weight support system). For more information see the instructions for use. Safety space behind the treadmill: min. L: 2 m (6ft 6.74") x treadmill width. Children are only allowed to be on the treadmill, if under permanent supervision and secured by a fall prevention system.

* We recommend a dedicated line 3 phase power connection (400 Volt AC3~/N/PE 50/60 Hz 16 to 32A fuse) and 3-phase device for high speed, fast acceleration, special applications and for heavier subjects due to higher performance. For all single phase powered treadmills the natural performance limitations of single phase voltage supply apply due to the law of physics. For professional performance diagnostics, athletic training and high performance applications we strongly recommend running machines with 3-phase voltage power supply from model size min. pulsar 3p, venus or saturn. ** measured and calibrated up to 900 watts. Depending on gearings and revolutions per minute. Tolerances may occur on loads above 900 watts.
